Introduction

1   Imported Domains

Internal representation dependencies.

```
import statement from "ri.newgen"

import entity from "ri.newgen"
```

2   Task

task:
    id of the task
    on_cluster id of the cluster in which the task will be executed
    private_data list of entity private of the task, don't need to communicate
with the other cluster

```
task = id:int x private_data:entity* x on_cluster:int x synchronization:bool

statement_task = persistant statement -> task
```
